Professional Summary | M.Sc. Data & Computational Science student with 3+ years' experience building reproducible ML pipelines, CNN models, and ETL workflows across healthcare, education, and industry. Proven track record in image classification (81% accuracy, 0.61 F1) and data-driven consulting for 25+ teams, with strong skills in Python, PyTorch, scikit-learn, and SQL

Education

UNIVERSITY COLLEGE DUBLIN

Dublin, Ireland

Masters in Data and Computational Science

September 2025 – September 2026

- Applying advanced mathematics and machine learning techniques to evaluate and improve the reliability of AI model systems
- Elected Class Representative (300+ peers), liaising between students and faculty to drive curriculum improvements and student engagement

KONGJU NATIONAL UNIVERSITY

Kongju, South Korea

Bachelor in Computer Education, Applied Mathematics | First-Class Honours (1:1)

March 2021 – February 2025

- Designed and delivered a 1-month Python & Algorithms course at Brebeuf College (Toronto, Canada), teaching 70+ students; recognised for communication and learner engagement
- Mentored 40+ undergraduate students on applying scikit-learn to breast cancer detection tasks, guiding them through data preprocessing, feature selection, and model evaluation

CHARLES III UNIVERSITY OF MADRID

Madrid, Spain

Exchange in Data Science and Engineering

August 2023 – August 2024

- Organised networking and technology seminar events with Microsoft, Google, and 4 other companies as a member of the Business Analytics Association in UC3M

Experience

SK ENMOVE

Seoul, South Korea

Project Intern

April 2025 – July 2025

- Delivered AI/DT consultations to 25+ cross-functional teams, guiding adoption of Power BI dashboards, automated workflows, and RAG-based decision support chatbots to improve data-driven solutions in operations
- Contributed to full lifecycle BI analysis for supply chain optimisation, from requirements gathering to prototyping models, aligning digital transformation efforts with business goals

OUTTA

Spain, South Korea, Canada, US

Chief Operating Officer, Deep Learning Mentor

June 2022 – August 2024

- Co-founded global AI education NPO, scaling the AI bootcamp to 900+ applicants in 2 weeks through data-driven A/B testing of social media advertising campaigns, optimising targeting strategy
- Designed and delivered applied machine learning curriculum (regression, classification, pandas, scikit-learn, TensorFlow) with interactive notebooks, increasing course completion and learner satisfaction by 20%

THE ANKH

Seoul, South Korea

Data Analyst

June 2021 – June 2023

- Implemented ETL pipelines in PostgreSQL and automated reservation workflows, reducing manual reporting by 35% and enabling more efficient resource planning
- Developed analytics dashboards and conducted customer review analysis (text mining, sentiment analysis), surfacing insights that improved menu design, customer experience, and evidence-based staffing decisions

Projects

Sketch Image Classification System (Secured 2nd Place, National Hackathon)

- Improved performance to 81% accuracy, 0.61 F1-score using a PyTorch-based CNN pipeline (VGG16 + focal loss), DBSCAN/Agglomerative clustering for noise removal

Agriculture Price Forecast (Ranked in the Top 20 out of 1655, National Hackathon)

- Achieved a 0.0886 NMAE score with a Lasso linear model by incorporating financial factors affecting agricultural prices, after benchmarking against LSTM and tree-based models (XGBoost, CatBoost)
